BSc. OF GEOLOGICAL ENGINEERING

PROFESSIONAL PROFILE

Bachelor's degree in Geological Engineering, offering a well-rounded university education and a strong passion for prospecting, exploration, and management of hydrogeological, mining, hydrocarbon, and geotechnical ventures. Proficient in executing fieldwork, laboratory analyses, and leveraging information technologies for Geology-related applications.

Skills and Abilities

- ✓ Troubleshooting Abilities
- ✓ Team Collaboration
- ✓ Emotional Intelligence
- ✓ Critical Thinking Aptitude
- ✓ Analytical Proficiency
- ✓ Effective Communication Skills

Languages Spoken

Spanish: Main Language
English: Intermediate Proficiency

Driver's License

Vehicle Categories: A - I (Professional)
Motorized Vehicles: Categories B II - C

PROFESSIONAL EXPERIENCE

SIG CONSULTANT Jan 2023 — Nov 2023
Datablitz Corp — Lima

I am involved in the execution of geoprocessing and data extraction tasks of digital elevation models (DEM). My role covers the whole process, starting with the acquisition and processing of DEM images from various regions of Peru. This involves employing geostatistical methods and programming techniques to generate morphometric parameters for alluvial cones, micro-watersheds and watersheds. These parameters are integral components used within advanced computational models, specifically deep learning algorithms, to predict various external dynamic phenomena.

SIG CONSULTANT Feb 2022 — Dec 2022
Private — Lima

I provide my services independently through projects and specific jobs on platforms such as Fiver, Upwork and my professional network. I perform some tasks such as digitizing maps in QGIS, elaboration of cadastral maps, data extraction, thematic and specialized maps. I also work as a Data Analytics assistant in different fields.

A selection of accomplishments includes:

- Skilled in utilizing GIS, AutoCAD, and Python software applications.
- Formulate precise criteria for conducting topographic surveys and field validations, ensuring data accuracy and meticulous identification of potential disparities or incongruities within existing data..
- Develop a differentiated work to contribute to the quality of projects developed by the client.

EDUCATION

General English Nov 2023 — May 2024
Wattle Colleague — Melbourne Australia

Bachelor in Geological Engineering Sep 2013 — Nov. 2021
National University of San Antonio Abad del Cusco — Cusco

TRAINING COURSES

- Alluvial aquifer modelling and water sustainability management, GIDAHATARI — March 2023
- Power BI, ZEGEL IPAE — Marzo 2022
- Mining Geology, TEPSUP — March 2022

IT TRAININGS

Office 365	advanced	Python	basic
ArcGIS	intermediate	SQL	intermediate
QGIS	intermediate	Power BI	intermediate
AutoCAD	basic	HTML & CSS	intermediate
Leapfrog Geo y Mining	basic	Javascript	basic
Adobe Illustrator	intermediate	Rstudio	basic
